

TY-WIRE

HYBRID SCREEN MEDIA

TY-WIRE HYBRID SCREEN MEDIA

TY-WIRE

The jump from woven wire cloth to polyurethane can be big — the open area and weight difference can significantly alter the performance of your vibrating screen and affect your product quality. Ty-Wire offers greater open area than polyurethane and actually weighs less than wire cloth.

- Ty-Wire is proven to last 4-7 times the life of wire cloth
- Available in side- or end-tensioned hooked sections, or modular panels
- Manufactured with an engineered composite material over woven wire cloth; it performs similar to polyurethane but offers greater open area
- Tapered openings virtually eliminate pegging
- Rugged enough to handle heavy loads in wet or dry applications
- Lightweight sections help improve safety
- Decreases noise

TOP SIZE

Up to 4" depending on the application and tonnage

CUT SIZE RANGE

Square and slotted openings available

Square:	Slot:
Smallest Square: 1/8"	3/16" X 1"
Largest Square: 1-5/8"	1/4" X 3/4"
